# Difference of QIP constructions

Pre-posed QIP construction

Post-posed QIP construction

Different structure

Pre-posed: [argument] as it is written that [quotation]  
Post-posed/inserted: [quotation = argument], as it is written

## [near verbatim quotation = argument] QIP [verbatim quotation] formula

- 4 times in Shenoute's Canon 6 and once in Besa
- Sort of a hybrid of pre-posed and post-posed QIPs.

Shenoute, *He Who Sits Upon His Throne*

ἀλλὰ ἐβόλ ρω χε-ντοϥ π-εντ-αϣ-πλασσε ν-νεϣ-γ-ζη[τ] ν-θε ετ-χηρ ζ̄ν-νε-ψαλμοϥ χε-π-  
εντ-αϣ-πλασσε μαγααϣ ν-νεϣ-γ-ζητ (MONB.YJ p. 33)

“but because it is he who has shaped their hearts, as it is written in the Psalms:  
“the one who himself shaped their hearts”

- Shenoute's tendency to use postposed QIPs → more skillful than Besa (?)

## Conclusions

- The project of SFB1136 and eTRAP have collaborated working on text reuses in Shenoute's Canon 6 and Besa's letters and sermons
- We found quotations unknown to the previous studies in both corpora
- With newly found quotations, we conducted a study on the location of  $\text{ⲛⲟⲉ ⲉⲧⲕⲏⲁ}$
- Besa uses more pre-posed  $\text{ⲛⲟⲉ ⲉⲧⲕⲏⲁ}$  than Shenoute
- Perhaps this indicates that Shenoute embedded biblical quotations more skillfully than Besa in monastic educational discourse
- Full application of Coptic Wordnet to TRACER is the next challenge
